

# DataSync Solutions: Empowering Real-Time Data Excellence

Streamlined, Scalable, and Insightful Data Management Platforms

## EEH Kafka Consumer Framework

A robust solution for seamless, real-time data integration from the EEH Kafka cluster to diverse sinks, ensuring efficient data flow and adaptability.

- **Sinks Supported:** Hive (HDFS), RDBMS (Oracle, MS SQL, etc.), Teradata, MongoDB, Elastic-search, and custom connectors.
- **Key Benefit:** Enables high-speed, reliable data streaming for real-time analytics and processing.

## DQ4QD: Data Quality for Quick Decisions

A comprehensive platform offering self-service data quality validation and reconciliation across multiple systems, ensuring accuracy and trust in your data.

- **Supported Platforms:** Hadoop Hive, RDBMS, Teradata, file-based systems, object storage, MongoDB, and more.
- **Key Benefit:** Empowers teams with intuitive rules and reporting for proactive data quality management.

## DCM/Databank: Metadata Mastery

A powerful system for cataloging, searching, and identifying metadata and entities, providing a unified view of your data landscape.

- **Features:** Centralized metadata management, intuitive search, and entity identification.
- **Key Benefit:** Simplifies data governance and enhances discoverability across complex datasets.

## BAM: Business Activity Monitoring

A dynamic platform for near real-time monitoring of business activities, delivering actionable insights and rapid response capabilities.

- **Features:** Tracks SLAs, generates alerts, and monitors complex fulfillment systems.
- **Key Benefit:** Accelerates decision-making with real-time visibility into critical business processes.
